

***Benefits to be gained by implementation of the new
“Restore Jobs” trade strategy being proposed by the
New Hope for America Foundation.***

We would be able to effectively:

- 1) Revive the U.S. economy without needing “stimulus” money.
- 2) stop the massive manufacturing job-loss trend in the U.S.
- 3) stop the rapid selling-off of U.S. owned capital assets in the U.S. to foreigners
- 4) create an indisputable “level playing field” for U.S. manufacturers.
- 5) eliminate *all* tariffs.
- 6) eliminate *all* nation-focused quotas.
- 7) eliminate import-related anti-dumping legislation.
- 8) make balanced trade a reality.
- 9) create a stable market permitting U.S. oil companies to invest in new high-tech oil extraction
- 10) revive idle U.S. factories.
- 11) stimulate entrepreneurship in manufacturing.
- 12) improve and have more control over our national security.
- 13) significantly improve Federal, State, and Local tax revenues.
- 14) reduce the cost of government’s attempts to protect U.S. jobs.
- 15) eliminate our trade deficit *and* the related sending of billions of trade-deficit dollars overseas.
- 16) U.S. dollar becomes much stronger with no more U.S. trade-deficit dollars *flooding* the world \$ market.
- 17) higher education would see increased enrollments in engineering, math, and science.
- 18) computer programming jobs would return to the U.S.
- 19) tool making, mold making, and machinist’s trades would be revived.
- 20) eliminate the pressures to “outsource” which today is putting U.S. suppliers out-of-business.
- 21) indirectly cause the creation of a large middle class in developing nations.
- 22) improve our export potential while at the same time reducing our volume of imports.
- 23) improve the security of import inspections due to U.S. manufacturers doing the inspections.
- 24) U.S. economic growth would receive a very big stimulus.
- 25) significantly improve U.S. international relations.
- 26) the workers of Mexico would be paid billions more per year, thus creating a very large middle class.
- 27) most of the illegal aliens from Mexico, now here in the U.S., would want to return home to Mexico.
- 28) with good pay in Mexico, far fewer illegal aliens would be coming here looking for work.
- 29) reduce the amount of money available to Communist China for building their military.
- 30) reduce the money available to Communist China for buying influence around the world.
- 31) imports of tainted drugs, food, toys, etc. would be stopped by U.S. manufacturer’s quality control
- 32) have a true transition to a “fair free trade” competitive environment in the global market
- 33) America would once again become “*the* land of opportunity” to start new manufacturing businesses.

All of these fantastic benefits are achievable from *one* new already-proven trade strategy !
